

ABSTRACT OF THE DISCLOSURE

An accelerator pedal for an industrial vehicle has a main pedal and a selector pedal. The main pedal is provided for adjusting an opening degree of
5 acceleration. The selector pedal is pivotally supported on the main pedal for switching between forward travel and reverse travel and includes a selector pedal body, a forward step and a reverse step. The forward step is provided on the selector pedal body for the forward travel. The reverse step is provided on the selector pedal body in parallel with the forward step for the reverse travel. At least
10 one of the forward and reverse steps is mounded from the selector pedal body.
